C2.D4 : Report on the completed technical arrangements/infrastructure for Nafpaktia

November 2023

Executive Summary

Deliverable C2.D4, entitled " Report on the completed technical arrangements/infrastructure for Nafpaktia " concerns the technical description and the technical specifications of the required equipment to cover the implementation needs of the proposed actions of the Municipality of Nafpaktia in the context of action C.2 of the LIFE-IP CEI-Greece project (LIFE18IPE/GR/000013). In particular, this technical report concerns the supply and installation of the following equipment:

1. Ten (10) semi-underground bio-waste collection bins, with a capacity of 1.3m³
2. Fifty (50) collection bins for plastic waste (PET) 210lt
3. One (1) vertical paper press – baler.
4. Five (5) autonomous smart bins for the collection of recyclable waste with a capacity of 120lt, with the possibility of connecting to a reciprocating system
5. Three (3) open-top containers for the collection of livestock waste
6. Construction of a Mobile Green Point through the supply of one (1) special vehicle.
7. Two (2) lifting cranes for the removal of the semi-underground bins.
