## Summary

This deliverable includes an assessment of the current situation regarding food waste generation in Greece for the year 2022. To conduct the evaluation, the relevant legislation of the European Union and the updated Eurostat guidelines, published in June 2022, were followed. This assessment was completed in October 2024 and the acquired data was used for the national reporting on food waste generation along the food supply chain for the year 2022.

The report includes a description of the methodology employed for food waste quantification, as well as the amounts of food waste at each stage of the food supply chain, *i.e.*, primary production, food processing and manufacturing, retail and other distribution of food, and consumption stage, which encompasses restaurants and food services, as well as households.
