## CIRCULAR ECONOMY IN ACTION THROUGH LIFE IP CEI GREECE

**30/5/2026, 09:00-12:00**

The Ministry of Environment and Energy is organizing a conference titled: “Circular Economy in action through LIFE IP CEI GREECE Project”, which will take place on May 30 at the Tae Kwon Do Stadium in Paleo Faliro, as part of the ATTICA GREEN EXPO exhibition.

The conference is addressed to local government authorities, businesses, as well as anyone interested in the applications of the circular economy. Its aim is to inform the public about prevailing trends in other European countries, highlight best practices implemented in Greece, and present the European Union’s requirements regarding the future of waste management in Greece, in line with

the principles of the circular economy.

The conference, in which representatives from the Ministry of Environment and Energy, as well as partners of the LIFE IP CEI GREECE project will participate, aspires to serve as a key platform for information and meaningful dialogue among stakeholders who will be called upon to implement circular economy practices in their daily operations by 2028.
